

Ice Foe

Snow and ice melting pellets

It's no accident that more businesses and institutions prefer **Ice Foe** pellets. They're the hottest thing on ice – the world's fastest acting deicer. **Ice Foe** is ideal for the fast, safe, and effective removal of snow and ice from steps, sidewalks, parking lots and other paved surfaces.

Unlike other deicers, **Ice Foe** turns into a brine solution almost immediately by attracting moisture from its own surroundings. Furthermore, **Ice Foe** is the only deicer on the market that's exothermic in its melting reaction. It gives off heat, speeding the melting process.

APPLICATIONS

Melting snow and ice.

FEATURES AND BENEFITS

Instant Melting Action – **Ice Foe** works at least 8 times faster than rock salt in the first 30 minutes at 20°F, economical – **Ice Foe's** uniform particles spread easily for complete coverage. It should be

applied sparingly as a small quantity clears a large area, Safe, Clean

100% Soluble – **Ice Foe** dissolves completely without trace. Unlike rock salt it doesn't

leave white or muddy deposits. Used as directed

Ice Foe will not damage footpaths, road surfaces, vehicle bodies and finishes. It will not

discolour boots, shoes or damage carpeting from foot traffic, melts

all the way down to

-25°F – **Ice Foe** penetrates ice, breaking

its bond to the ground surface.

Also it keeps on working . . . long after

traditional ice melters have stopped. It also prevents melted ice from re-freezing,

eliminating the formation of a hazardous water film.
