

Pace Urinal Caps

Standard Cap

Fits standard/flat strainers

Raised Cap

Fits raised/domed strainers

**Biological deodouriser
and descaler**

The Problem - Toilets stink

The Cause - Uric acid scale build up in urinal pipes

The Solution - Pace

**Pace Urinal Caps for sustained
and effective odour control in
normal, flow reduced and waterless urinals**

Pace Urinal Caps are the perfect solution to eliminate malodours from smelly urinals. The Pace blend of sophisticated enzymes and bacteria breaks down uric scale build-up, protein waste, volatile fatty acids and ammonia, whilst creating self renewing microbe biofilms inside pipework and plumbing. The biodegradable acid content in **Pace** Urinal Caps reduces build-up of inorganic or hard water scale and remaining deposits are softened and easily dislodged by flushing. **Pace** urinal caps can save you money as they only need one flush per day. Some urinals waste 12 litres of water an hour so imagine how much water and money you could save by turning down your water flow!

Features/Benefits

Eliminates foul washroom smell, breaks down uric and lime-scale build-up, prevents blockages and saves water.

Biodegradable, non-flammable, non-toxic.

Pace is entirely friendly to the environment

Only one cap needed per urinal – no messy blocks.

Cap longevity will depend on throughput.

The use of bleach or other toxic chemicals will kill Pace bacteria and end their good work, so follow a strict bio-cleaning regime using only compatible products like **Pace liquid**, ensuring a fresh and pleasant smelling washroom and substantial water savings.

Pack Size: 10 Caps per tub.
